Storyboards for Interplanetary Travel App

AIM:

The aim is to create storyboards representing the user flow for a futuristic interplanetary travel mobile app using Balsamiq.

Step 1: Define the User Flow

1. Identify Key Screens:

- - Home Screen: Search for interplanetary flights
- - Destination Screen: Select a planetary destination
- - Trip Details Screen: Choose spaceship class and departure date
- - Cart/Booking Summary Screen: Review booking details
- - Checkout/Payment Screen: Enter passenger details and payment method
- - Booking Confirmation Screen: Receive ticket and boarding information

2. Map the User Journey:

Users search for available spaceflights, select their destination, choose trip details, review their booking, enter payment information, and receive booking confirmation.

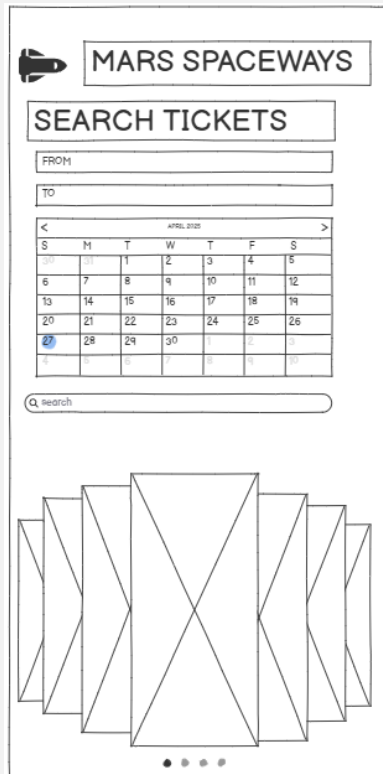

Step 2: Create Storyboards Using Balsamiq

1. Install Balsamiq from <https://balsamiq.com/>.
2. Create a new project and add wireframe screens.
3. Design each screen using basic elements (buttons, text fields, images).

4. Arrange the screens in logical navigation order and connect them.

Example Screens for Galactic Voyager App

Home Screen

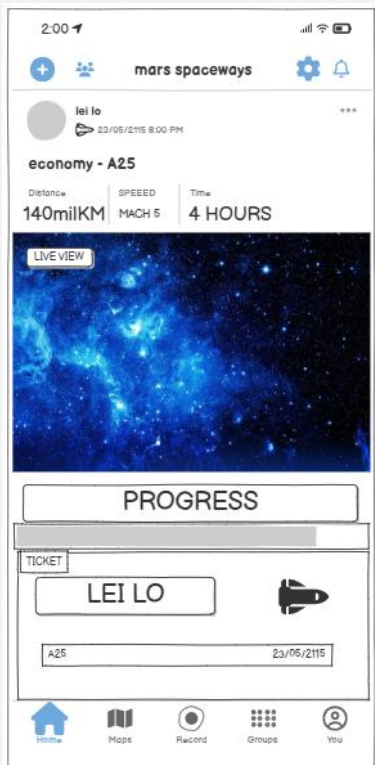

- Search bar to find space tickets.
- Calendar to pick travel date.
- Featured travel destinations carousel.

Destination Screen

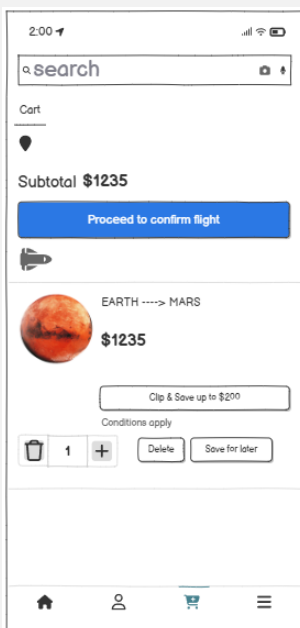

- List of planetary destinations with selection buttons.

Trip Details Screen

- Choose spaceship class and date of departure.
- Display travel distance, speed, and duration.

Cart Screen

- Show selected destination, subtotal, and proceed to checkout button.

Checkout Screen
